

## Overview

### Useful For

Identifying specific causes contributing to sudden cardiac death

### Testing Algorithm

An interpretation will be provided by Mayo Clinic staff pathologists within a formal pathology report sent to the referring medical examiner.

Appropriate stains and other ancillary testing may be performed at an additional charge.

For more information see [Pathology Consultation Ordering Algorithm](#).

### Special Instructions

- [Pathology Consultation Ordering Algorithm](#)
- [Pathology Consultation Cover Letter](#)

### Highlights

Our consultative practice strives to provide the highest quality diagnostic consultative service, balancing optimal patient care with a cost-conscious approach that supports the rapid turnaround time for diagnostic results.

### Method Name

Medical Interpretation

### NY State Available

Yes

## Specimen

### Specimen Type

SUDC Study Specimen

### Ordering Guidance

This test is orderable for the Sudden Cardiac Death Pathology Evaluation study.

### Shipping Instructions

Attach the green "Attention Pathology" address label (T498) to the outside of the transport container before putting into the courier mailer.

### Necessary Information

All requisition and supporting information must be submitted in English.

**Each of the following items is required:****1. All requisitions must be labeled with:**

- Patient name, date of birth, date of death, and medical record number
- Name and phone number of the referring pathologist, ordering provider, or medical examiner
- Anatomic site and collection date

**2. A preliminary/final autopsy report and brief patient history are essential to achieve a consultation fully relevant to the ordering provider's needs.****3. A specific diagnostic question is required.** Include diagnostic question in a cover letter or in the requisition notes/comments. For ease of submission, the [Pathology Consultation Cover Letter](#) form can be completed and sent with the specimen.**Specimen Required****1. The heart specimen is required for testing.**

2. Send whole blood in addition to heart specimen, if available.

**Specimen Type:** Heart specimen**Supplies:**

- Pathology Packaging Kit (T554)
- Ambient Shipping Box, 5 lb (T970)

**Specimen Volume:** Entire specimen**Collection Instructions:**

1. Fix entire specimen in formalin for a minimum of 24 hours.
2. Following fixation, lightly wrap specimen in formalin-soaked paper towel, place in a leak-proof sealable bag with a small amount of formalin, seal, and ship ambient in a sturdy shipping container.

**Additional Information:** Paraffin block may be accepted.**Specimen Type:** Whole blood**Container/Tube:** Lavender top (EDTA)**Specimen Volume:** 10 mL**Collection Instructions:**

1. Invert several times to mix blood.
2. Send whole blood specimen.

**Forms**

If not ordering electronically, complete, print, and send a [Sudden Cardiac Death Pathology Consultation Request](#) with the specimen.

**Specimen Minimum Volume**

Heart specimen: See Specimen Required; Blood: 1 mL

**Reject Due To**

All specimens will be evaluated at Mayo Clinic Laboratories for test suitability.

**Specimen Stability Information**

Specimen Type	Temperature	Time	Special Container
SUDC Study Specimen	Ambient (preferred)		
	Refrigerated		
	Frozen		

## Clinical & Interpretive

### Clinical Information

Sudden, unexpected death in individuals less than 40 years of age with a strong probability of cardiac disease (including cases of obvious cardiomyopathy, with likely genetic underpinning). This evaluation is offered to provide the careful dissection and diagnostic experience that may be needed for subtle or overt cases of cardiovascular disease.

### Reference Values

An interpretive report will be provided.

### Interpretation

This request will be processed as a consultation. Appropriate stains and ancillary testing will be performed, and an interpretation provided.

### Cautions

[Appropriate tissue sampling and fixation are required in order to make a diagnosis.](#)

### Clinical Reference

## Performance

### Method Description

All requests will be processed as a consultation case. Ancillary studies will be performed only if deemed to be diagnostically indicated.

### PDF Report

No

### Day(s) Performed

Monday through Friday

**Report Available**

14 to 28 days: Cases requiring additional material or ancillary testing may require additional time.

**Performing Laboratory Location**

Mayo Clinic Laboratories - Rochester Main Campus

**Fees & Codes****Fees**

- Authorized users can sign in to [Test Prices](#) for detailed fee information.
- Clients without access to Test Prices can contact [Customer Service](#) 24 hours a day, seven days a week.
- Prospective clients should contact their account representative. For assistance, contact [Customer Service](#).

**Test Classification**

Not Applicable

**CPT Code Information**

88037
