MAYO CLINIC LABORATORIES

Test Definition: MITAN

Mitotane, Plasma

Overview

Useful For
Assessing compliance or making dosage adjustments for mitotane

Method Name
Gas Chromatography Mass Spectrometry (GC-MS) Confirmation with Quantitation

NY State Available
Yes

Specimen

Specimen Type
Plasma Na Heparin

Shipping Instructions
Ship specimen refrigerated.

Specimen Required
Collection Container/Tube: Green top (sodium heparin) (Lithium heparin and PST/plasma gel tubes **are not** acceptable.)
Submission Container/Tube: Plastic vial
Specimen Volume: 1 mL
Collection Instructions: Within 2 hours of collection, centrifuge and aliquot plasma into plastic vial.

Forms
If not ordering electronically, complete, print, and send a Therapeutics Test Request (T831) with the specimen.

Specimen Minimum Volume
0.5 mL

Reject Due To

Gross hemolysis	OK
Gross lipemia	Reject
Gross icterus	OK

Specimen Stability Information

Specimen Type	Temperature	Time	Special Container

Plasma Na Heparin	Refrigerated (preferred)	21 days	
	Ambient	72 hours	
	Frozen	28 days	

Clinical & Interpretive

Clinical Information

This test is intended for the use of therapeutic monitoring of the drug mitotane in patients being treated for adrenal carcinoma. Guidelines suggest monitoring mitotane serum/plasma levels every 2 to 3 weeks for the first 3 months. After reaching a plateau, the interval can be extended (eg, every 6 weeks). Mitotane is a key drug for the treatment of adrenal cortical carcinoma. Due to its narrow therapeutic window (14 to 20 mcg/mL), monitoring its concentration is crucially important.

Reference Values

Therapeutic: 14-20 mcg/mL

Interpretation

In the literature when mitotane is used to treat adrenocortical carcinoma, the maximum benefit is seen when plasma mitotane concentrations are between 14-20 mcg/mL.

Cautions

No significant cautionary statements

Clinical Reference

Performance

Method Description

After protein precipitation, mitotane is analyzed by gas chromatography with mass spectrometry.(Unpublished Mayo method)

PDF Report

No

Day(s) Performed

Tuesday, Thursday

Report Available

2 to 7 days

Specimen Retention Time

14 days

Performing Laboratory Location

Mayo Clinic Laboratories - Rochester Superior Drive

Fees & Codes

Fees

- Authorized users can sign in to Test Prices for detailed fee information.
- Clients without access to Test Prices can contact Customer Service 24 hours a day, seven days a week.
- Prospective clients should contact their account representative. For assistance, contact Customer Service.

Test Classification

This test was developed and its performance characteristics determined by Mayo Clinic in a manner consistent with CLIA requirements. It has not been cleared or approved by the US Food and Drug Administration.
